hp@Geethika MINGW64 ~
$ npx create-react-app officespacerentalapp
Creating a new React app in C:\Users\hp\officespacerentalapp.
Installing packages. This might take a couple of minutes.
Installing react, react-dom, and react-scripts with cra-template...

added 1296 packages in 1m
272 packages are looking for funding
  run `npm fund` for details
Initialized a git repository.
Installing template dependencies using npm...
added 17 packages, and removed 1 package in 7s
271 packages are looking for funding
  run `npm fund` for details
npm warn allow-scripts 2 packages have install scripts not yet covered by allowScripts:
npm warn allow-scripts   core-js@3.49.0 (install: (install scripts present))
npm warn allow-scripts   core-js-pure@3.49.0 (install: (install scripts present))
npm warn allow-scripts Run `npm approve-scripts --allow-scripts-pending` to review, or `npm approve-scripts <pkg>` to allow.
Removing template package using npm...

removed 1 package, and audited 1312 packages in 9s
271 packages are looking for funding
  run `npm fund` for details
28 vulnerabilities (9 low, 6 moderate, 13 high)
To address issues that do not require attention, run:
  npm audit fix
To address all issues (including breaking changes), run:
  npm audit fix --force
Run `npm audit` for details.
npm warn allow-scripts 2 packages have install scripts not yet covered by allowScripts:
npm warn allow-scripts   core-js@3.49.0 (install: (install scripts present))
npm warn allow-scripts   core-js-pure@3.49.0 (install: (install scripts present))
npm warn allow-scripts Run `npm approve-scripts --allow-scripts-pending` to review, or `npm approve-scripts <pkg>` to allow.
Created git commit.
Success! Created officespacerentalapp at C:\Users\hp\officespacerentalapp
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

Created git commit.
Success! Created officespacerentalapp at C:\Users\hp\officespacerentalapp
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

  npm test
    Starts the test runner.

  npm run eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd officespacerentalapp
  npm start

Happy hacking!

Project Structure

App.css

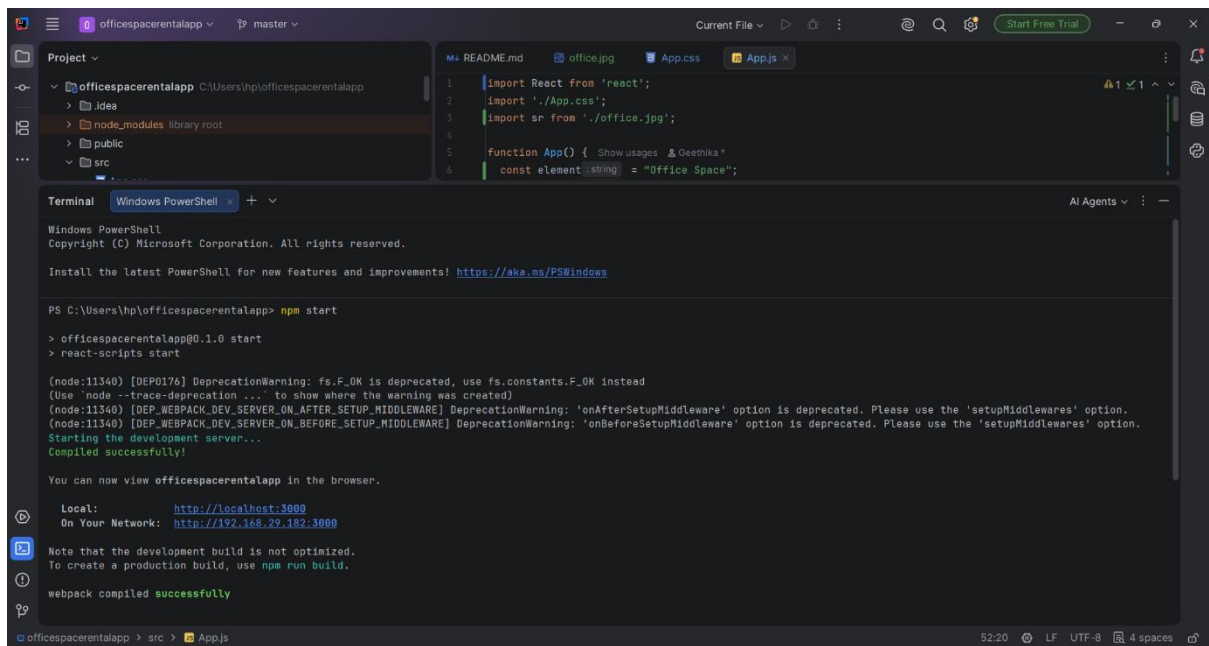

App.JS

The screenshot shows the VS Code editor interface. The left sidebar displays the project structure for 'officespacentalapp', including folders like 'idea', 'node_modules', 'public', and 'src'. The 'App.js' file is selected in the 'src' folder. The main editor area shows the code for 'App.js', which imports React, App.css, and an image. It defines a function 'App()' that uses a loop to render office objects from a list. The code includes comments and JSX elements for rendering office details and rent status.

```
1 import React from 'react';
2 import './App.css';
3 import sr from './office.jpg';
4
5 function App() { Show usages & Geshika
6   const element<string> = "Office Space";
7   const jsxatt<Element> = <img src={sr} width="25%" height="25%" alt="Office Space" />;
8
9   // Single Office Object
10  const ItemName<{> = { Name: "DBS", Rent: 50000, Address: 'Chennai' };
11
12  // List of Office Objects for looping
13  const officeList<[{Name:string,Rent:number,> = [
14    { Name: "DBS", Rent: 50000, Address: 'Chennai' },
15    { Name: "FastOffice", Rent: 65000, Address: 'Bangalore' },
16    { Name: "CoSpace", Rent: 45000, Address: 'Hyderabad' }
17  ];
18
19  // Logic to calculate rent status styling
20  let colors<any[]> = [];
21  if (ItemName.Rent <= 60000) {
22    colors.push('textRed');
23  } else {
24    colors.push('textGreen');
25  }
26
27  return (
28    <div style={{ padding: '20px' }}>
29      <h1>{element} , at Affordable Range</h1>
30      {jsxatt}
31      <h1>Name: {ItemName.Name}</h1>
32      <h3 className={colors[0]}>Rent: Rs. {ItemName.Rent}</h3>
```

Development Server Execution

The screenshot shows the VS Code editor interface with the terminal window open. The terminal displays the output of the 'npm start' command, showing the development server starting successfully. The output includes deprecation warnings and the URL to view the application in the browser.
